

ASSIGNMENT FOR INSTRUCTION

Assignment of students to classes should be done on the basis of what is best for the individual student.

Good administration takes into account the importance of parental understanding of the assignment procedure used in the school. The school principal should take into account input from parents and teachers and other staff members in the most effective placement of students in classes. The assignment of classes to teachers is the responsibility of the Superintendent working in cooperation with the principal and the teachers concerned.

Grouping within the classroom is desirable and teachers should be encouraged to carry out this procedure. Grouping should be flexible. Some children may be grouped together for one activity and, almost immediately following, they may be regrouped for another activity. Children should not, however, remain in the same groups throughout the school year.

Adopted: March 19, 1992
